This is a series of three weekend workshops leading to 50 hours of training in Hypnotherapy and is intended for participants who would like to learn how to utilize the unconscious mind in their counseling endeavors. Utilizing hypnotherapy approaches in counseling greatly increases the effectiveness of the treatment process and enables the client to better take care of their mental health via better stress management. The training consists of 50 contact hours of training. Those completing the entire 50 hours of training will be awarded certificates of completion from the Center for Counseling and Consulting in Casselberry, Florida, a provider of continuing education for the Florida Department of Professional Regulation.

Dr. Robert M. Bollet is a retired professor in the Counseling Education Program at the University of Central Florida. He has been a State Professional Advocate for children, youth and adults for many years. He is Past-President of the Florida Association of Counselor Education and Supervision and Past-President of the Florida Counseling Association. As a licensed psychologist he has maintained a private practice since 1974, specializing in anxiety, depression, ADHD, marriage and family counseling and learning style diversity.
